DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Watson.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2-9, 11-13 and 22-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Watson in view of Bockwinkel. Watson discloses the claimed invention except for the labyrinthine seal and the door having an inner portion. Bockwinkel teaches that it is known to provide a door with a labyrinthine seal as set forth at column 6, line 59 to column 7, line 34 and an inner portion as set forth at column 3, lines 35-38. It would have been obvious to one having ordinary skill in the art at the time the invention was made for the seal of Watson to be a labyrinthine seal and an inner portion, as taught by Bockwinkel in order to prevent communication of ambient air through the sealing strip and improve insulation.

5. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Watson in view of Sherman. Watson discloses the claimed invention except for composite acoustic barrier material. Sherman teaches that it is known to provide a door with composite material as set forth at column 4, line 14+. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the door of Watson with the composite material, as taught by Sherman in order to damping sound.

6. Claims 14-21 and 25-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Watson in view of Bockwinkel and Sherman. Watson discloses the claimed invention except for the labyrinthine seal and the door having an inner portion. Bockwinkel teaches that it is known to provide a door with a labyrinthine seal as set forth at column 6, line 59 to column 7, line 34 and an inner portion as set forth at column 3, lines 35-38. It would have been obvious to one having ordinary skill in the art at the time the invention was made for the seal of Watson to be a labyrinthine seal and an inner portion, as taught by Backfield in order to prevent communication of ambient air through the sealing strip and improve insulation. Further, Watson discloses the claimed invention except for composite acoustic barrier material. Sherman teaches that it is known to provide a door with composite material as set forth at column 4, line 14+. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the door of Watson with the composite material, as taught by Sherman in order to damping sound.

Claim Rejections - 35 USC § 112

7. Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, there is insufficient structure to support the function "achieves a sound ... or better" in line 8.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
